Consulting Security Services*

# Professional Services

Cautela Labs marries its Security Operation Center capabilities with Professional Security consulting services to deliver comprehensive, enterprise-wide security assessment, design, and deployment services to help you build effective information security solutions. Expert security consultants can show you how to implement network security best practices that can reduce online threats to your critical business assets. Cautela Labs Security Services' security experts use toolsets and the latest security threat intelligence with countermeasures to help you build effective security programs that enhances your business operations and improves your security posture.

Cautela Labs can help you:

- Mitigate security threats to business operations
- Proactively address security issues before they are exploited
- Comply with regulatory guidelines
- Lower operating costs through the consistent deployment of security policy and procedures

- Provide secure extensions of business applications
- Improve productivity by optimizing security efforts for efficient management and maintenance
- Shorten implementation cycles for new security solution deployments and software updates
- Limit the impact of security incidents with advanced preparation and incident response.

Cautela Labs Security Services offers an extensive range of consulting security services in the areas of security governance, privacy, threat mitigation, data security, identity, and access management. Cautela Labs can help you with your security posture by assisting you with:

**Security Assessment:** Cautela Labs security risk assessment can help provide a comprehensive assessment of your security vulnerabilities. Data breaches or fines for noncompliance with regulatory standards can result in lost competitive position, and customer confidence. Security risk assessment services from Cautela Labs are designed to assess your security vulnerabilities, help you address gaps in your security controls and facilitate the development of effective processes that can position IT to optimally support

your business needs.

**Information Risk Assessment:** Cautela Labs helps you via its information risk analysis methodology to analyze business information risk and select the right controls to mitigate that risk.

**Governance, Risk and Compliance Management:** Cautela Labs services assess an organization's environment to determine where gaps exist between the client's existing security program and compliance-drive requirements. Cautela Labs identify these gaps and outline how to close them, achieving compliance requirements. During this process, consultants work to leverage existing security and IT investments, helping to ensure technology initiatives are aligned with business and bottom-line objectives. With expertise in PCI, GLBA, HIPAA, NERC, SOX our security professionals respond to audit trends as they emerge to prepare you for a favorable exam of your IT controls.

We work with you to:

- Document the controls you have in place & identify those you need
- Ensure that your policies and procedures align with best practices
- Make your best practices more visible to examiners as evidence

A person with a backpack stands on a rocky trail overlooking a vast mountain range under a cloudy sky. The person is seen from behind, with their arms outstretched, standing on a rocky outcrop. The foreground is filled with tall, golden-brown grass. The middle ground shows a dirt path leading up to the person. The background features a large, rugged mountain range with steep, rocky slopes and some greenery in the valleys. The sky is filled with dramatic, grey and white clouds, with a hint of sunset or sunrise colors near the horizon.
